REMOTE WAKE ON LAN

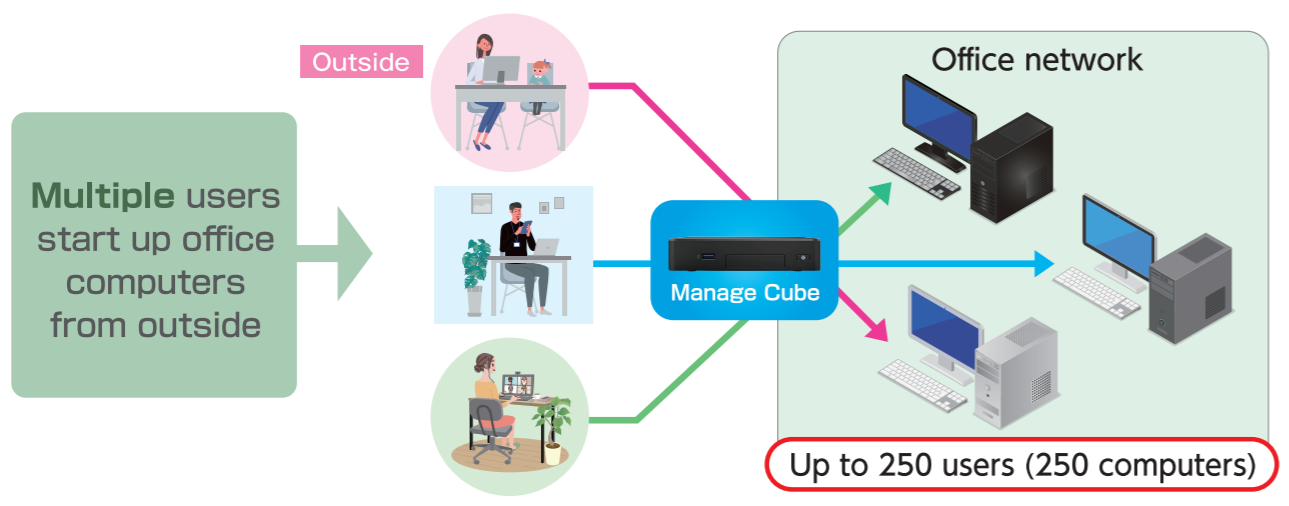

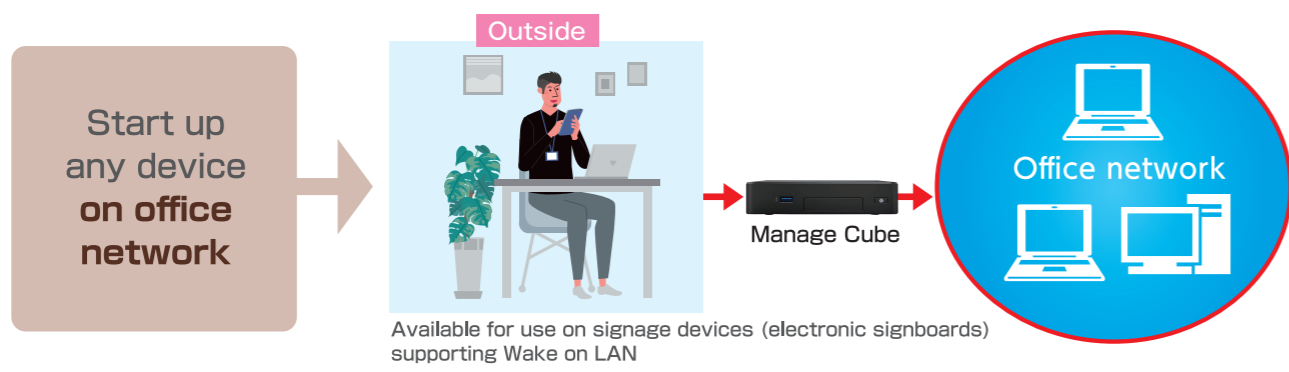

Easily start up from outside the office

Enhanced convenience with timer function

Features

Start up

Manage Cube Wake on LAN enables you to easily start up office network devices from outside the office*. It can start up personal computers and any other device on the office network, as well as signage devices (electronic signboards) supporting Wake on LAN. Manage Cube Wake on LAN can start up 250 users (computers) at once.
 *Some devices are not supported. The device must be connected remotely.

Automation

One of the advantages of Manage Cube Wake on LAN is the automatic start-up with timer settings. You can designate the date and time of the automatic start-up of each device such as "Weekdays 8:50" and "Weekends 10:00" with the timer registered on the schedule list. It enables convenient management of the network by automatically start up multiple devices at designated date and time.

Start up with timer settings

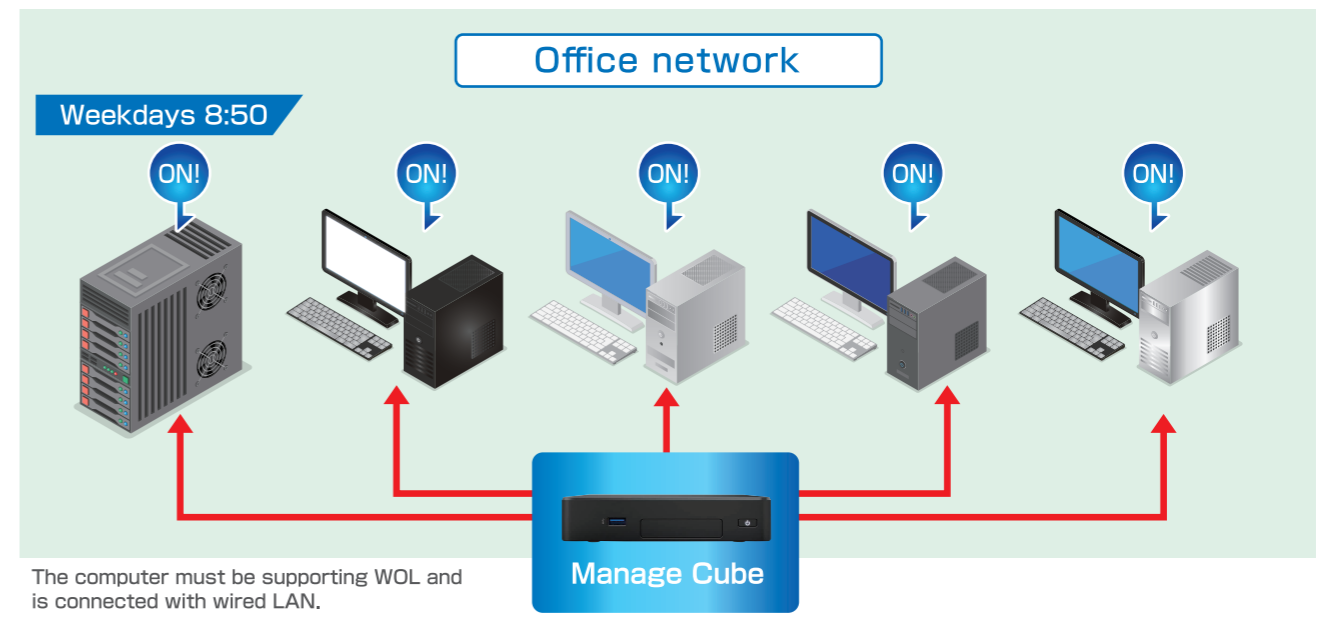

The timer enables automatic start-up at designated date and time.
